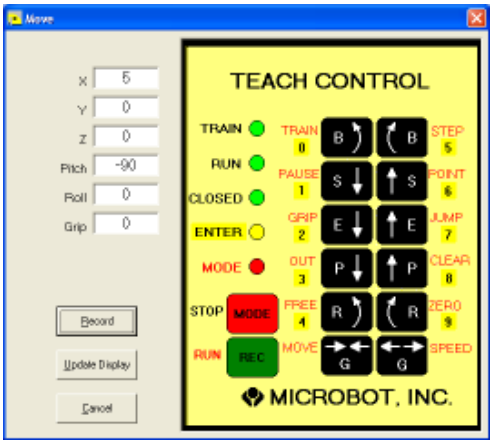
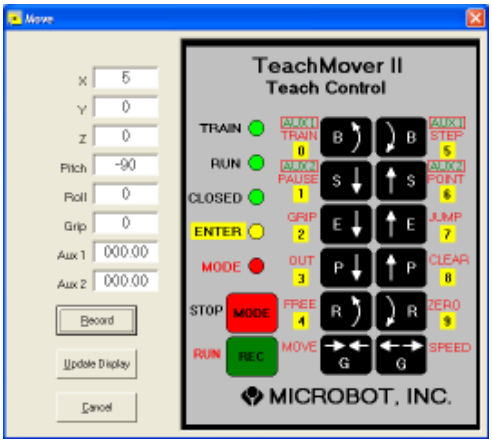
Microbot Control Center (MCC)

The Microbot Control Center software allows on-screen programming of robots and robotic workcells. It provides the power to edit, record, and file a stored program using an on-screen Teach Pendant. The MCC software works with both the TeachMover and the TeachMover II.

P/N 90067 - $600.00



Virtual Teach Pendant

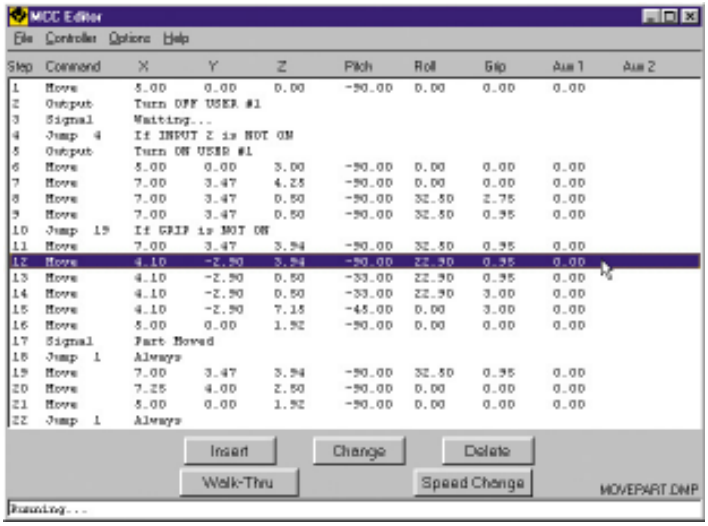


Virtual Teach Pendant

The software allows students to edit and change a program, enter new steps, and see exactly where each step will take the robot. As students explore the capabilities of the software, they see how easy it makes the development of complex programs.

Curriculum

The MCC software comes with a 10 day student curriculum with daily objectives and quizzes.

Curriculum Activities


1. Exploring the Software!
2. Why start at HOME?
3. What can we Change?
4. The Virtual Pendant!
5. Turn Stuff On/Off
6. Jumping Around
7. TeachMover II
8. Two at a Time
9. FIX It
10. Challenges
